

# ***Table of Contents***

## ***Conductor Sizing and Protection Calculations***

### **Part A – General Conductor Requirements**

- Conductor Insulation Property [Table 310.13]
- Conductor Allowable Ampacity [310.15]
- Conductor Sizing [110.6]
- Terminal Ratings [110.14(C)]
- Conductors in Parallel [310.4]
- Conductor Size – Voltage Drop
- Overcurrent Protection [Article 240]
- Overcurrent Protection of Conductors – General Requirements [240.4]
- Overcurrent Protection of Conductors Specific Requirements
- Equipment Conductors Size and Protection Examples

### **Part B – Conductor Ampacity Calculations**

- Conductor Ampacity [310.10]
- Ambient Temperature Ampacity Adjustment Factor [Table 310.16]
- Conductor Bundling Ampacity Adjustment Factor [Table 310.15(B)(2)]
- Ambient Temperature and Conductor Bundling Adjustment Factors
- Current-Carrying Conductors
- Conductor Sizing Summary

### **Calculations Questions**
